Continuation of 5. does NOT place the application in condition for allowance because: The 2 references (page 5 of 8) discussed by Appplicant were not received by the patent Office or at least not scanned. The Examiner could not consider these references. At the interview Applicant stated thast an neutral pH was never used on recycle paper. U.S. Patent 5,116,474 yuses a neutral pH to treat recycle paper. Note that it has an effective date of Oct. 1, 1990 which is earlier than the effective date of the instant Application (CIP date of May 6, 1994). Do ANY of the claims contain subject matter not disclosed in S.N. 07/518,935? It is noted that the article "Neutral Deinking Makes Its Debut" states that it has been in operation since July 1992. This is over one year prior to the effective date of May 6, 1994. It is also noted that the term "neutral range" in claim 41 does not define over the pH of the Japanese Patent Document.
